Personal dosimeter PDM-313

The MY DOSE series allows you to check at any time the accumulated amount of radiation exposure. They are designed to be placed in a pocket (chest or abdomen) of a worker who handles radiation or a person who happens to enter a radiation handling facility.

Data-holding function

- Measurement range: 0.01 to 99.99 mSv
- Energy range: 0.025 eV to 15 MeV

Features

- Easy-to-handle, compact and lightweight
- Easy-to-read digital display
- Various models for different purposes

A personal dosimeter for neutron radiation measurement
